

1. **As part of the Medicaid formulary, Care Wisconsin Health Plan provides certain over-the-counter medications when they are ordered by a physician or nurse practitioner for a medical need, provided that a product with a valid NDC* is used and the generic product is selected, when available. For example:**

Acetaminophen	Insulin
Acidophilus	Laxatives
Antacids	Lice Control Products
Antibiotic Ointments	Loperamide
Aspirin	Loratadine
Cough Syrup	Melatonin
Diphenhydramine	Omeprazole
Fish Oil	Ophthalmic Lubricants
Glucosamine Sulfate	Pseudoephedrine
Glucose Gel	Topical Analgesics
Hemorrhoid Products	Topical Antifungals
Hydrocortisone Creams	Topical Antipruritics
Ibuprofen	Vaginal Antifungals
	Vitamins

2. **Care Wisconsin Health Plan provides the following prescription medications as part of the Medicaid formulary:**

Agents used for Anorexia, Weight Loss, or Weight Gain
Barbiturates
Benzodiazepines
Sorbitol
Vitamins

Additional Notes:

1. The Pharmacy Committee is responsible for reviewing and revising the Medicaid formulary.
2. Generic over-the-counter and prescription medications are provided when available. Requests for brand-name products are honored if the request is based upon medical necessity, the request is approved by the Care Team, and the brand is specifically ordered by a physician or nurse practitioner.
3. Requests for herbal or nutritional supplements, other than indicated above, must be approved by the Care Team in a case review in consultation with the Pharmacist or Nurse Practitioner Practice Leader.
4. Medicaid formulary medications are provided without copay.

*A valid NDC is defined as a National Drug Code that is recognized by the State of Wisconsin's claims processing system.
